

## Code Release Iteration 2

### Summary

This code release includes the implementation of various user stories aimed at enhancing the functionality and usability of the application. The focus was on creating a robust back-end API, user authentication, and improving the user interface across different pages, including the Login Page, Prep Dashboard, Recipe Book Page, Ingredient Market Page, Provider Cart Page, Manager Dashboard, and Prep Manager.

**Note:** In my initial project proposal, I planned to utilize vanilla react as the sole frontend framework. Since, I have shifted to Next which takes over the routing capabilities, enables me to easily create server side rendered dashboards, and utilize all libraries that come with next off the shelf. It's a simple upgrade that requires lots of research. But when it comes to the level of design found in my official design artifacts, the design should be almost no different. The page file within each of routes acts as the container component that is

### Requirements

This code release supports the following Features and User Stories:

| Feature             | User Story                                                                                                                             | Traceability ID |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Login Page          | As an Admin I would like to have to sign in before managing the admin list So that I know whoever is completing this is authenticated. | 003             |
| Login Page          | As an Admin I would like to use my password so that I can access the manager dashboard.                                                | 003             |
| Prep Dashboard Page | As a User I would like to be able to search for prep items So that I can quickly add items I'm looking for                             | 005             |
| Prep Dashboard Page | As a User I would like to choose categories to filter the list so that I can quickly find the item I'm looking for                     | 006             |
| Prep Dashboard Page | As a User I would like to uncomplete a prep item so that I can revert the list completion if necessary                                 | 010             |
| Prep Dashboard Page | As a User I would like to be able to complete a prep item so that it updates the prep completion in real time.                         | 007             |
| Prep Dashboard Page | As a User I would like to be able to view how much must be completed of each item so that I know how much should be done.              | 005             |
| Prep Dashboard Page | As a User I would like to edit the notes that are a part of a prep item so that I can keep the process always updated.                 | 008             |

|                        |                                                                                                                                                    |     |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Prep Planning Page     | As a User I would like to be able to add an item to the prep list so that it can be a part of the daily workflow.                                  | 012 |
| Prep Planning Page     | As a User I would like to be able to delete an item from the prep list so that I can remove unnecessary prep items                                 | 012 |
| Prep Planning Page     | As a User I would like to be able to view all potential prep items So that I can add the necessary items to tomorrow's list                        | 011 |
| Prep Planning Page     | As a User I would like to be able to search potential prep items so that I can quickly find what I'm looking for                                   | 013 |
| Prep Planning Page     | As a User I would like to be able to update the quantity that must be done So the prep list accurately represents the next day's workload.         | 010 |
| Recipe Book Page       | As a User I would like to be able to select specific recipes So that I can locate the steps to complete the recipe.                                | 016 |
| Recipe Book Page       | As a User I would like to be able to filter recipes by category so that I can quickly find the recipe I'm looking for.                             | 012 |
| Recipe Book Page       | As a User I would like to be able to search recipes by key term so that I can quickly find the recipe I'm looking for.                             | 013 |
| Recipe Book Page       | As a User I would like to be able to view all recipes so that I can use them when necessary                                                        | 014 |
| Ingredient Market Page | As an Admin I would like to be able to edit the quantity I am adding to the cart so that I know how much of what I'm adding to my order.           | 018 |
| Ingredient Market Page | As an Admin I would like to be able to search for ingredients by name so that I can quickly find the ingredient I am looking for.                  | 019 |
| Ingredient Market Page | As an Admin I would like to be able to view daily suggestions based on ingredients with low inventory so that I can make orders quickly.           | 022 |
| Ingredient Market Page | As an Admin I would like to be able to select what provider I am choosing for an ingredient So that I can have multiple carts working at any time. | 020 |

|                        |                                                                                                                                                                                    |     |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Ingredient Market Page | As an Admin I would like to be able to see the current pricing of my ingredients so that I can quickly compare multiple providers.                                                 | 021 |
| Provider Cart Page     | As an Admin I would like to view both current carts next to one another so that I can see what ingredients are in what cart.                                                       | 023 |
| Provider Cart Page     | As an Admin I would like to cancel a cart item from a cart so that I can take unnecessary items out of the cart.                                                                   | 024 |
| Provider Cart Page     | As an Admin I would like to be able to see the quantity I am adding to the cart so that I know how much of what I'm adding to my order                                             | 025 |
| Provider Cart Page     | As a System I would like to print the total of all items in one cart so that the total is constantly accumulating.                                                                 | 026 |
| Provider Cart Page     | As an Admin I would like to view the total cost of each cart so that I can gauge how much I will be spending on each cart separately.                                              | 027 |
| Manager Dashboard Page | As an Admin I would like to have an idea of where inventory is at for all items, so I know when to restock inventory.                                                              | 029 |
| Manager Dashboard Page | As an Admin I would like to be able to view how prep is coming along for the day for each position so that I can help if needed or make sure work is being done at the right rate. | 030 |
| Manager Dashboard Page | As an Admin I would like to view the time to open So that I have an idea of what needs to be done still.                                                                           | 031 |
| Prep Manager Page      | As an Admin I would like to be able to edit a prep list item so that the prep list items are up to date with operation.                                                            | 033 |
| Prep Manager Page      | As an Admin I would like to be able to search for a prep list item by search key so that I can quickly find the item I am looking for                                              | 034 |
| Prep Manager Page      | As an Admin I would like to be able to filter the prep list by category So that I can view specific groups of items.                                                               | 035 |
| Other                  | As a developer I would like to log in to the middleware for backend so that I can start tracking backend transactions.                                                             | 000 |

The plan would be to continue cleaning up code leading up to the final submission date in March. This would also allow me to have time to test and create the poster.

**The following are user stories that I am requesting to take out of scope, as they are far too ambitious, especially for a shortened class length:**

1. As a System I would like to take the user to the provider site with a filled-out cart so that they can review the order before completing the order
2. As an Admin I would like to open my current cart in the web browser so that I can complete the order through the provider.

**I haven't been able to start on these stories yet, and they will require large amounts of research, much more than I already have on the topic.**

### Functional Requirements:

**Data Backup:** Will be implemented once the hosting machine is purchased, setup and running.
